## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Figure 1 shows species 1; figure 7 shows species 2; figure 16 shows species 3; figure 17 shows species 4; figure 18 shows species 5; figure 19 shows species 6; figure 20 shows species 7; figure 21 shows species 8; figure 24 shows species 9; figure 25 shows species 10; figure 26 shows species 11; figure 27 shows species 12; figure 28 shows species 13; and figure 29 shows species 14.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Art Unit: 3764

Figure 1 shows an applicator in a form of a plate; figure 7 shows a roller; figure 16 shows a roller has a handle; figure 17 shows a roller has a different shaped handle; figure 18 shows a roller having needles being arranged in two strips; figures 19-21, 24, and 25 show different embodiments of rollers and handles; figures 26-29 show different embodiments of applicator's bodies.

The following claim(s) are generic: claim 1 is generic.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species listed above each has a different structure.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Justine R Yu whose telephone number is (703)308-2675. The examiner can normally be reached on 8:30am - 6:00Pm.
